September 19, 2011

Dear Parents,

For the past twelve years, students in the Huntington Beach City School District have participated in hands-on, inquiry based science lessons. Each teacher has received training and materials to teach investigations in Earth, Life, and Physical Science. Our students, parents, teachers, and administrators have all seen significant growth in science achievement and the California Content Standards Test scores. Known for many years as *ScienceWorks*, this program was partially funded through a private grant. Sadly, our grant funding has come to an end.

In a commitment to provide our students with a high quality educational program and ensure that the Huntington Beach City School District remains one of the very best in Orange County, we need your help to sustain our valuable *ScienceWorks* Program. Each school year, it costs the district approximately \$10 per pupil to replenish supplies for the hands-on science kits. The district would be unable to provide this program were it not for the generous support and donations we receive annually from parents and from grants through the Huntington Beach Educational Foundation.

We hope you will support the *ScienceWorks* Program for our students. Every donation, both large and small, makes a difference and is greatly appreciated. Working together, we know our excellent schools will continue to meet your highest expectations. We thank you for your partnership and continued efforts to support a high quality educational program for your children.

Sincerely,

Gregory Haulk
Superintendent

Jennifer Shepard
Assistant Superintendent, Instruction
